# APPLY BUDBREAK TREATMENT WITH CONFIDENCE.

**Hazel Trex™** sampling kits enable accurate monitoring of the physiological status of female vines in orchards.

Based on the combined activity of relevant genes, the test results specify the actual stage of your vines to determine the optimal window for budbreak treatment.

## Easy-to-use molecular test kit

- Requires two drops of juice from 25 selected buds.
- Analysis is performed in the laboratory.
- Available in 2-test or 3-test kits.

## Monitor vines towards budbreak

- Determine budbreak status of orchards.
- Optimise timing of budbreak treatment.

## Improve yield

- Increase percent of budbreak.
- Optimise king flowers.
- Tighten flowering window.
